## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments with respect to claims 1,4-6 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1,4-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites "the space" in sections (b) and (c) which are indefinite because it is unclear whether reference is made to the space between the liner and the residual limb or the space between the liner and the socket.

Line 2 in each of claims 5 and 6 recite "the cavity" which lacks proper antecedent basis.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1,4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Caspers US PN 5,549,709 in view of Norvell US PN 5,728,169.

Art Unit: 3738

Caspers '709 discloses in figure 8, lines 16-19 of col. 5, lines 24-29 of col. 6, and lines 30-36 of col. 7 an artificial limb comprising liner 92 encasing limb 14, liner 60B spaced away from limb 14, outer socket 52, non-foamed non-porous polyurethane seal means 84/86, a vacuum 70 connected to both the space between liner 60B and limb 14 and the space between liner 60B and outer socket 52, regulator 80 capable of maintaining a vacuum in the event air leakage occurs at the seal means, power source 83, and a weight-actuated vacuum pump. Caspers '709 lacks the express written disclosure of the limb encasing liner 92 comprising an osmotic membrane. Norvell '169 teaches in lines 1-15 of col. 5 and lines 47-49 of col. 8 an artificial limb liner for encasing a limb comprising an osmotic membrane for wicking perspiration away from the limb providing extra comfort.

Therefore it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the artificial limb disclosed by Caspers '709 by substituting the liner 92 with the osmotic membrane liner taught by Norvell '169 in order to wick perspiration away from the limb providing extra comfort to the wearer.

### **Conclusion**

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3738

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
